

COME
AND VISIT US
AT LIBER
CONFERENCE
29 JUNE - 2 JULY
2010

The closest thing you'll get to autopilot in e-resource management.

EBSCONET® ERM Essentials™ puts you in full control of your e-resources by doing behind-the-scenes work for you. By auto-populating 100 data fields with your EBSCO collection-specific information, we help ease the burden of implementing and maintaining an ERM system.

You'll be able to manage your information more efficiently than ever before with one easy-to access, easy-to-maintain system, freeing up perhaps the most valuable resource you have – your time. All to help you keep your users on course with the resources they need.
